Daily Planner – To Do List

Project Description

For your individual project, you must create a Web application that manages daily tasks in the form of 'To Do' list. The goal of the application is to plan daily activities and track progress towards the activities. As an extension, the application should also include a calendar view.

Key features that should be included in the application are:
- Create/edit of tasks
- Set priorities to tasks
- Access to a Calendar view
- Access to a Summary view
- Responsive in a mobile format
- Access to Email notifications
- Includes integration with mail/calendar

Project Personas

Personas	What They Need to Accomplish in the App
User	- Create/edit tasks - Set priorities to tasks - See list of tasks - See Calendar view of tasks - See Summary view of tasks - Receive notifications

User Stories

1. As a User I need to create and edit tasks so I can see what I am supposed to do and track my progress.

2. As a User I need to add priorities to my tasks as some of them must be done before others.

3. As a User I need to be able move tasks to another day.

4. AS a User I need to see and filter the list of tasks by priority.

5. As a User I need a Calendar view of my tasks.

6. As a User I need to see a Summary view of my which shows daily progress.

7. As a User I need notifications that remind me of unfinished tasks.
